DETAILED ACTION

Specification

The current issue of the U.S application number 10/219,269 mentioned in the "Cross Reference to Related Application" of the present application has not been updated. Appropriate correction is required.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 4-10 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-8 of prior U.S. Patent No. 6604031B2. This is a double patenting rejection.

The examiner has found the identical subject matter between the present application and the patent. In the claims of the present application, the applicant has

Art Unit: 3663

replaced "a wayside controller" in the patent with "a control device on the ground." It would have been obvious that the "control device on the ground" performs the same function as the "wayside controller" of the patent. Also, the limitation of the claims includes the following: "the transmitter, to be connected to a track circuit, which transmits to the track circuit a train detecting signal", in which such the transmitter is provided for transmitting a train detecting signal to the track circuit in order to confirm the existence of a train on the track.

Conclusion

The prior art made of record, which are listed in PTO-892, and not relied upon are considered pertinent to applicant's disclosure includes the following: Fernandez et al.'s, Kull's, Murray's, Neeson et al.'s, Denny's, Oguma et al. (US 085B1), Oguma et al (US 244B2), and Oguma et al. (US 664B2).
